NIMA Declassification/Release Instructions on File

PPI

8 DEC 1972

SUBJECT: Programming of MC&G Products

TO: Director
Central Intelligence Agency
Office of Basic and Geographic Intelligence
Washington, D.C. 20505

1. Reference is made to your letter dated 1 Nov 1972, subject: CIA Requirements for DMA Maps and Charts, FY 1975-1982, which forwarded a statement of your total requirements for MC&G products.

2. The Defense Mapping Agency has initiated the formulation of the FY 74-79 MC&G program. The information provided by your letter, referenced above, will be utilized together with other validated requirements from other MC&G users in selecting projects to be accomplished in that period. Your expression of need for completion of the Series 1505 maps is noted and they will be included in the program. If you have particular need in the FY 74-79 time period for other specific MC&G products, not already produced to support your intelligence activities, those needs should be identified and forwarded to DMA by 5 January 1973. Particular emphasis should be placed on needs in the FY 74-76 period. Because of the relatively long lead times in producing MC&G products, DMA cannot otherwise assure MC&G responsiveness. *[Handwritten arrow pointing to the text]*

FOR THE DIRECTOR:

STATINTL

Deputy Director, DMA, for Programs,
Production and Operations
